

The Akasha Empowerment & Healing System

The winds of change sweep the Earth these years and open to possibilities we can hardly imagine. We see it in all aspects of life; technology, psychology, learning, social aspects of life, family patterns etc. This open up to endless opportunities for human beings. We can go wherever we want and become whatever we want. It open to a life in progress and prosperity which was not possible a few generations ago. By taking trainings within the Akasha Empowerment and Healing System you will get all the spiritual connection, necessary knowledge and methods to take advantage of the new time. You can't get the real benefit from just reading about it. What really matters are the initiations. These initiations will connect you to the powerful creation power which are available to all of us if we want it.

We don't really have a material or economic crises on the planet we have a spiritual crises. We are at a crossroad these years and we can chose to follow the path leading us towards a new golden age. And to achieve that, we will simply only need to realize that the "cake has an unlimited size" which mean there is enough for everybody. So we can open our heart and connect to the powerful energy of creation and use that with compassion and respect for each other and for the planet knowing that at a deeper level we are all connected to each other – In some way we are all at one.

There exist another path we can chose and following that one will take us to somewhere else. We can keep on believing that "the cake has a certain size and life is about how to get the hands upon the biggest piece of cake never mind the others". We can chose to keep on fighting and cheating each other. We can stay at the level of solar plexus and think at ourselves only without caring about the environment and the planet we live upon. That path will lead us towards some kind of destruction. The moment is now and the choice is ours.

The Akasha Empowerment & Healing System

The more we know about ourselves at the deepest level the easier it become to respect other people. The Akasha Empowerment & Healing System is born to assist modern people to find their deepest identity as human beings. To realize that at a certain level we are all at one. That means if you beat someone you also at some level are beating yourself. We are interconnected. The Akasha Healing System is about deep personal transformation. A system that offer you knowledge and processes you can follow to reveal your deepest inner secrets to yourself. It is a system that assists you to use your deep inner wisdom in your common life for the good of yourself, your family, your community and your planet.

The system was born in August 2001 in Denmark close to the so called Sky Mountain in Jutland. It was given to the Spiritual Trainer and Healer Jack Makani and his sister the Danish Master Healer Annmarie Bremer from a number of spiritual sources. The intention with the system is to ease the transition from what we call the old paradigm and into the so called new paradigm. We can also say to raise the vibration in the Human Aura. Or put in a third way - to create an easier connection to the source of Life.

The Akasha Empowerment & Healing System

So put in another way, it can be used for two purposes:

- To assist the ascension process that takes place these years.
- To heal unbalances in the personality.

The training will provide students with knowledge and skills to understand what is going on at the unseen level at all times. It will assist them to find the answers to who they are at the deeper level, why they are here and what they are supposed to do. It will enable them to maintain good health and how they can assist others to do the same. And further it will provide them with knowledge and skills that enable them to create the life they wish to live aligned with their life purpose.

Jack has been teaching the Akasha Empowerment & Healing System ever since 2001 and more and more people have come to the trainings. The system underwent a lot of improvement during the first 15 years. However there seems to be some stability and balance now in 2017.
